
aLIGO PSL monitor PD (D1002164-v1)

Circuit Board Documentation

Frank Seifert, Jan H. Pöld (*Max-Planck-Institut für Gravitationsphysik*)

Abstract

This circuit provides a photodiode with the following features:

- Advanced LIGO monitor photodiode
- Transimpedance feedback must be added to provide for desired transfer function

Contents

Safety Instructions

In order to operate the circuit properly and safely, review the following guidelines before installing and using the unit. Failure to do so may result in equipment damage or bodily injury:

This circuit was designed as a laboratory equipment to be operated only by trained and qualified technicians in research institutes or development departments. For safety reasons, usage by other persons or in other environments is *not* recommended.

This circuit uses extra-low voltage ($< 50 \text{ V}_{\text{AC}}$ and $< 75 \text{ V}_{\text{DC}}$) and is therefore exempt from the regulations of the *Low Voltage Directive* (2006/95/EC).

Sicherheitshinweise

Nehmen Sie vor Aufbau und Inbetriebnahme des Geräts folgende Empfehlungen zur Kenntnis, um die Schaltung korrekt und sicher zu betreiben sowie Schäden und Verletzungen zu vermeiden:

Diese Schaltung wurde als Laborausstattung entworfen, die nur von qualifizierten und eingewiesenen Technikern in Forschungsinstituten oder Entwicklungsabteilungen benutzt wird. Aus Sicherheitsgründen wird die Verwendung durch andere Personen oder in anderer Umgebung *nicht* empfohlen.

Diese Schaltung verwendet Kleinspannung ($< 50 \text{ V}_{\text{AC}}$ und $< 75 \text{ V}_{\text{DC}}$) und unterliegt daher nicht den Bestimmungen der *Niederspannungsrichtlinie* (2006/95/EC).

3mm InGaAs Photodiode EPIGAP

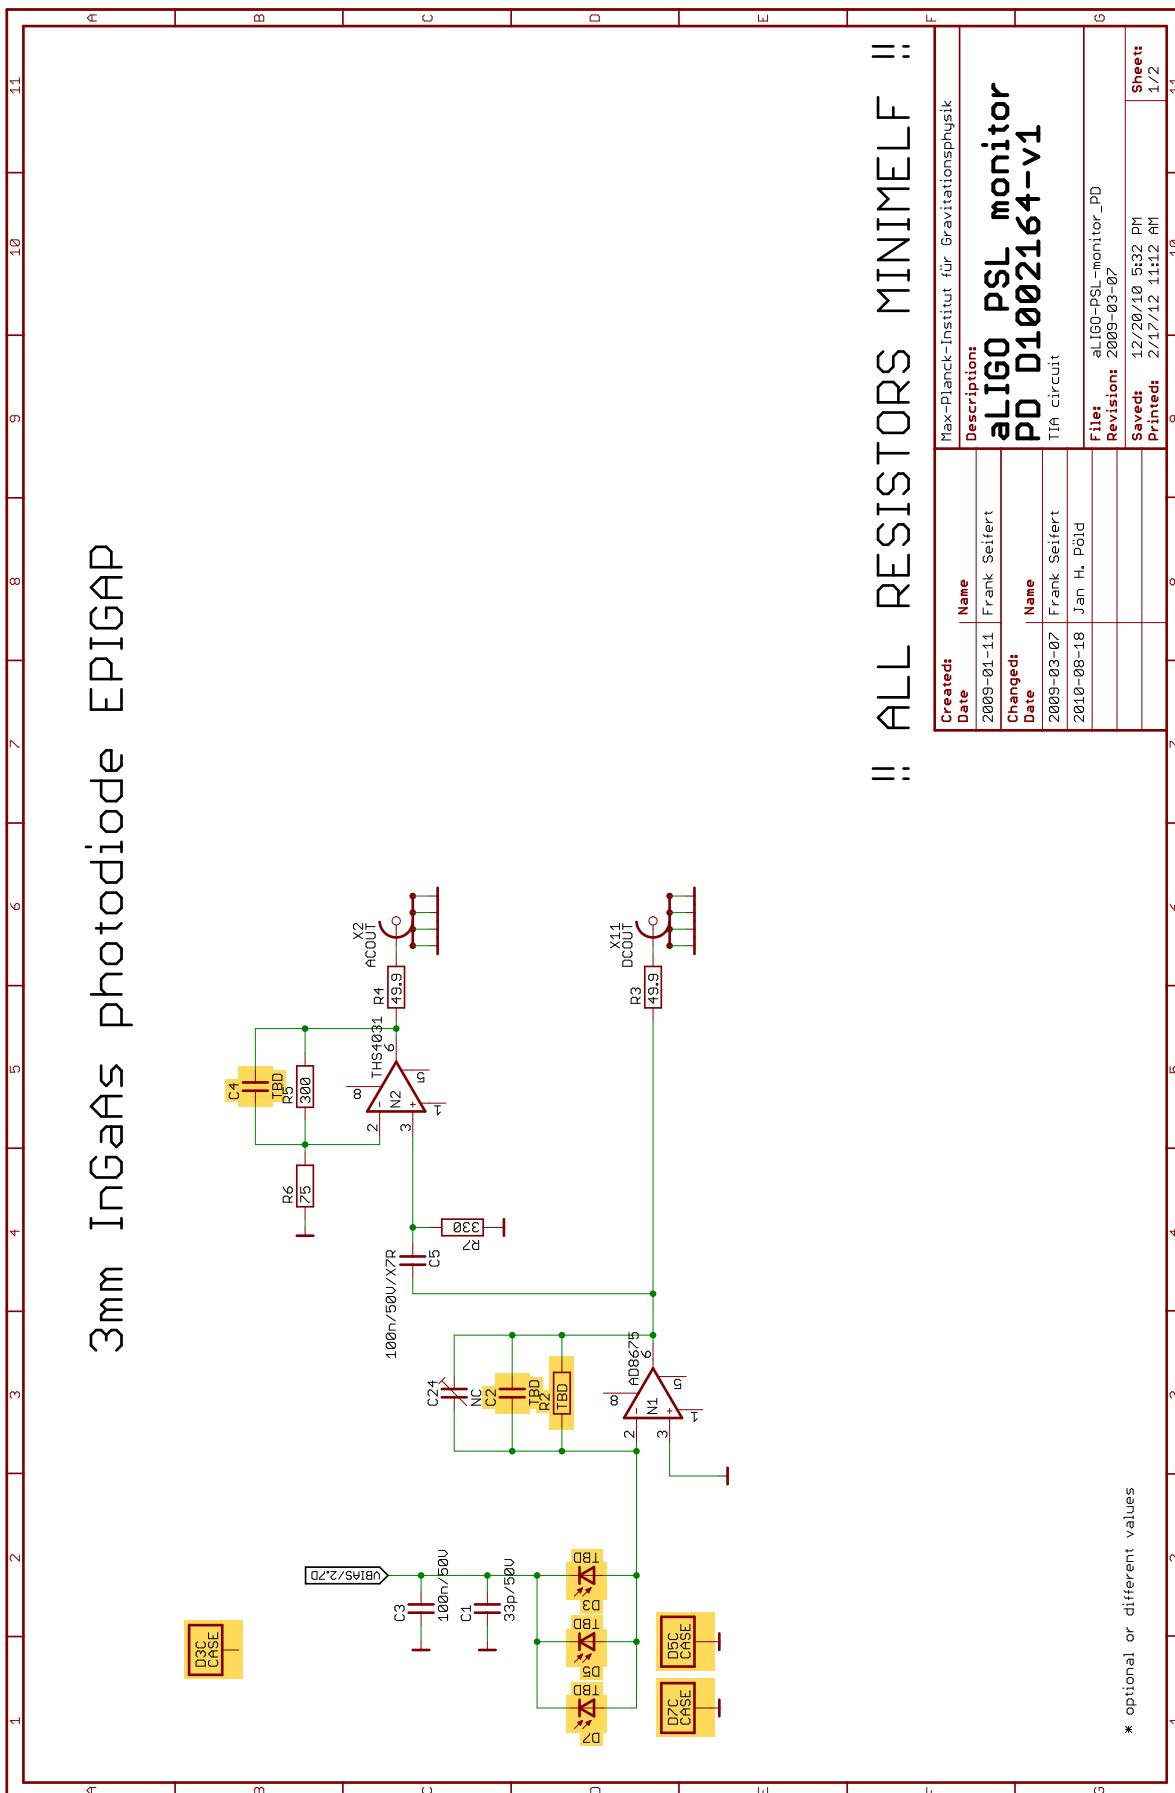

Figure 1: Project schematics (sheet 1)

Parts with undefined values are highlighted in orange

Components with undefined values are shown in blue

Circuit Lists

Standard properties: If not explicitly stated otherwise in the schematics or value and part lists, the circuit components have the following standard properties. Parts with 'better' properties can be easily substituted, but care should be taken if the specifications are *not* met.

- Wired resistors: Metal film 0.6 W, 1%, 200 V, TK 100
- SMD resistors: 1%, 150 V, TK 50, MiniMELF in thin film, other packages in thick film technology

Value list: The following list shows all components available on the board (sorted by part *values*) and can be used to quickly gather components. Names of components with undefined values are shown in **red**. Additional information can possibly be found directly on the board (or in the schematics).
