Larry,

Attached are the FTIR spectra for the cleaning assessment samples from the 22-A beam tube assembly. This should be attached to the FTIR report from Fitzsimmons dated 12/6/94.

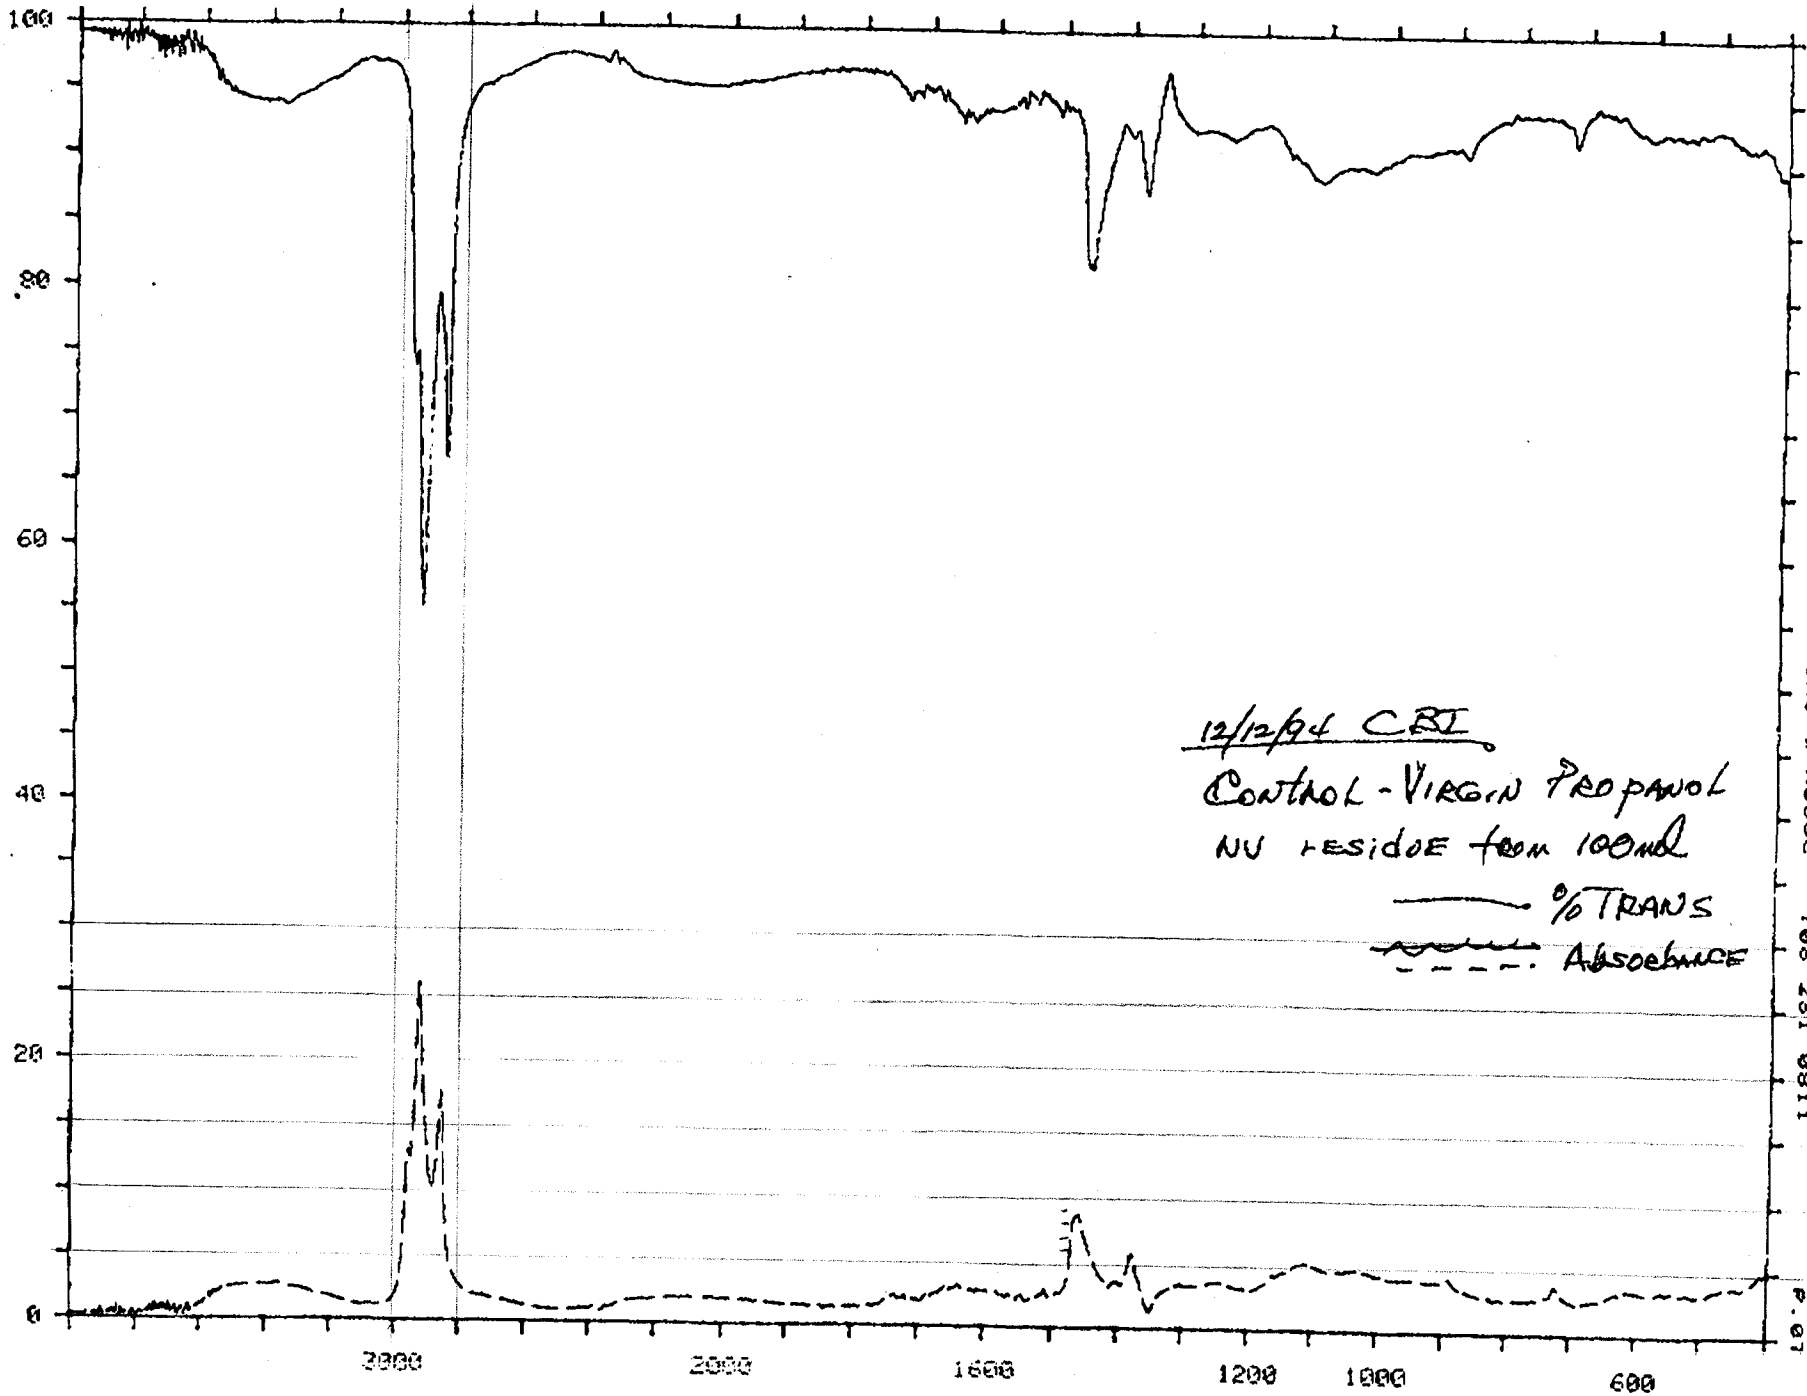

Bob Fitzsimmons informed me that the FTIR analysis of the 22-B cleaning assessment samples is completed and he will forward the report to me with the FTIR spectra's later today. I will fax them to you as soon as I receive them.

Please call if you have any questions or comments concerning the attached report.

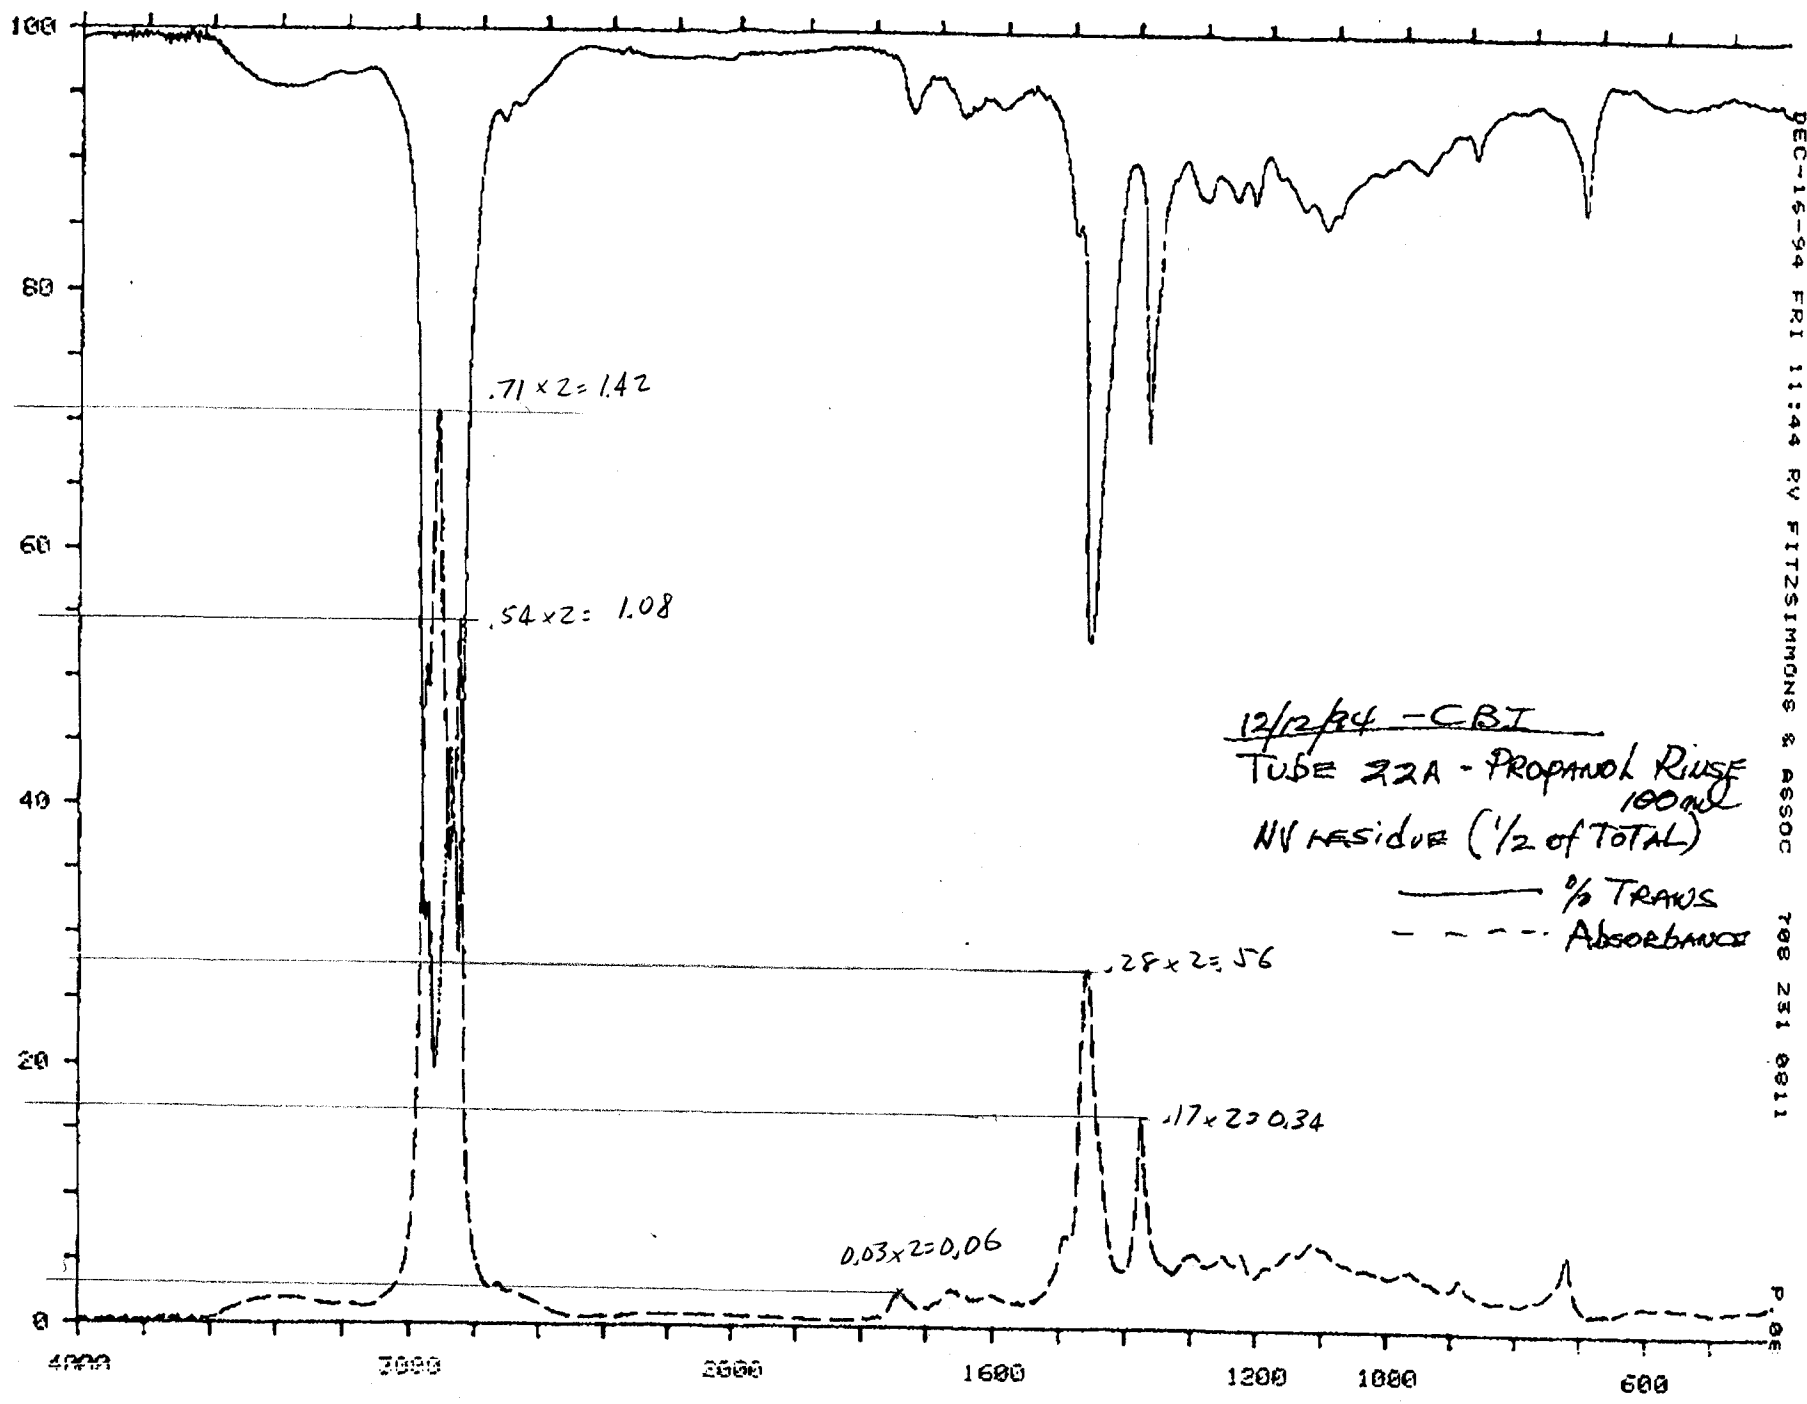

Steve Peters
