1 PURPOSE

This document is intended to describe the Hanford Data Acquisition System (DAQS) equipment layouts and signal connections. It is a supplement to the DAQS Final Design Document LIGO-T980028-00-C Data Collection Units (DCU) are described in section 2, the DAQS controller and EPICS data units in section 3, and the data storage equipment in section 4..

2 DATA COLLECTION UNITS (DCU) AND RACK LOCATIONS

DCU assignments and rack locations are shown in Figure 1:LVEA Rack Locations and DCU Locator Table. The Hanford site has eleven DCU, seven located in the LVEA and one each in the mid and end stations. Individual rack layouts and DCU signal connections are shown in the following subsections.
